SAVANTS' PLAGUE STUDY ON TO-DAY

166 New Cases Reported as Visiting Doctors Reach City.

FLEXNER MAY BE ASKED TO PRESIDE

Forty-one More Die-Conditions Show Outbreak Has Not Yet Begun to Wane.

With infantile paralysis still prevalent in almost every part of the greater city, the eminent physicians invited by the Health Department to study the spidemic will meet this morning at the College of Physicians and Surgeons. They will plan in their two-day conference, a series of investigations, hoping to solve the problems in the continued spread of the disease which are baffling the medical authorities. These plans will be worked out in the physicians' home laboratories.

One hundred and sixty-six new cases This number of cases has been exceeded only once. On July 11 195 were found.

Day after day the average number of cases reported in each twenty-four hours climbs a little higher. Yester-

doors, will be twenty-three men and one woman. The latter is Dr. Josephine Baker, director of the Bureau of Child Hygiene in the Health Department. She has been since the beginning of the epidemic in close touch with almost every detail of the fight.

General Discussion First.

The opening session will be given over to a general discussion of the progress and nature of the epidemic and to the formation of committees, each of which will take up one feature of the work to be done. Officials of the Health Department expect that Dr. Simon Flexner, of the Rockereller in-stitute for Medical Research, will be isked to preside at the general meet-

Manhattan Situation Unchanged.

The situation in Manhattan remains about the same. Forty-six cases were reported yesterday, equalling the high record, but an increase of only four above Tuesday.

One of these was found at 808 West End Avenue, between Ninety-ninth and 100th streets. Several have been re
Deny Lack of Harmony.

Health Department officials yesterday denied rumors of a lack of harmony among the invited physicians because Dr. S. J. Meltzer, of the Rockefeller Institute, who first urged the use of adrenalin in the treatment of infantile paralysis, had not been asked to attend the conference. It was said that Dr. Meltzer is a physiologist, while the invited physicians are pathologists or bacteriologists.

Elizabeth Chalmers, four-year-old daughter of Dr. Thomas Clark Chalmers, attending physician at the new Queensboro Hospital, where infantile paralysis patients are being sent.

One of these was found at 808 West End Avenue, between Ninety-ninth and 100th streets. Several have been re-

One of these was found at 808 West and Avenue, between Ninety-ninth and 100th streets. Several have been reported during the last week from that part of the upper West Side.

There were twenty new cases in Richmond.

At the conference, which is scheduled to begin at 10 o'clock behind closed doors, will be twenty-three men and sone woman. The latter is Dr. Josephine Baker, director of the Bureau of Child B
